ARGWEB Business Resilience

ARGWEB – Business Resilience

Professionally hosted within multiple secure Data Centres, each with multiple power sources and high speed internet connections. 100% redundancy.

Backed up Nightly.

Full Business Resilience processes in place, multiple person access to all implementation services.

No dependence upon any individual nor single organisation. Source code available to the developers group.

All local data downloadable by each ARG should they wish to switch systems or make local additional backups.

No dependence upon external funding sources or renewable licences.

Coded using industry standard programming languages using the ubiquitous LAMP stack.
