

Surrey Amphibian and Reptile Group

Strategic Framework 2018

Our Vision: To become the recognised source of conservation expertise for amphibian and reptile species within the county of Surrey through the excellence of our conservation knowledge and the relationships we have developed.

Our Mission: To support the conservation of wild, native amphibian and reptile species with an emphasis on the county of Surrey, through:

Determining the county distribution and status for all native amphibian and reptile species

Supporting habitat management and species action plans through advice and relationships

Outreach: improving the public perception of herpetological conservation

Building networks: peer engagement and supporting scientific and academic research

Conservation action: toad crossings, habitat management, policy advice and wildfire rescues.

Our Values: The values we wish to apply to all aspects of our work.
